

Product code: SP30

Description: Professional upgrade kit for extractor press SP20/SP21

New product / replacement: New

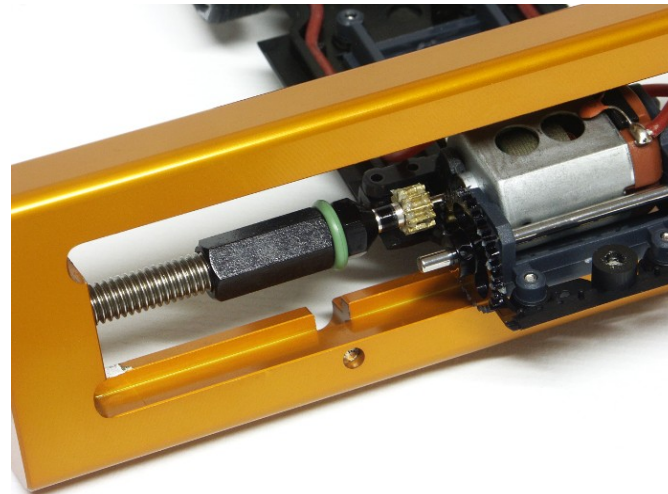

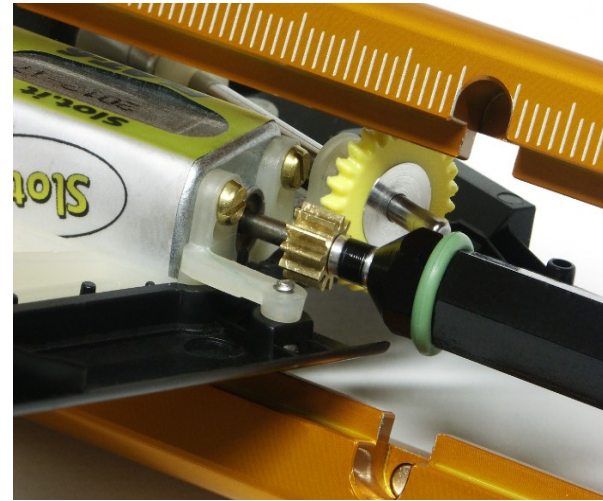

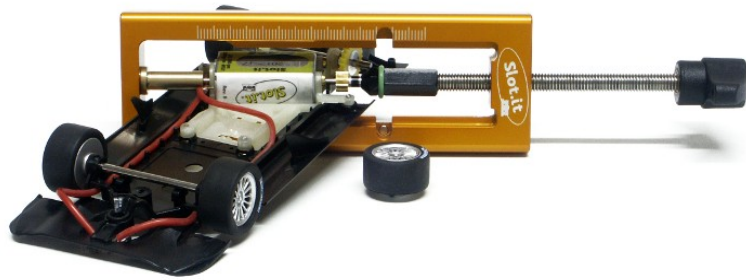

Accessory part for SP21; SP21 non included

Changing pinion: the nightmare of every slot racer! ...until today.
Indeed, the new upgrade kit for SP20 and SP21 allows adjustment* to the position of the pinion without the need to disassemble the drivetrain and motor from chassis.

The Mini Press may be used with either anglewinder and sidewinder motor mount types.

* The Mini Press can only press the pinion in. To pull it out, or to regulate its position, the Mini Puller SP31b is required.
